Full-Stack Developer • AI Integration & Legacy Systems

Full-Stack Developer with production experience in international teams and independent software delivery for businesses. University Technician in Programming (UTN). Specialized in legacy modernization, infrastructure migrations, and AI integration to automate processes and deliver production-ready solutions with a focus on security and performance at scale.

EXPERIENCE

Full-Stack Developer

Feb 2026 – Present

House of CB – Luxury British women's fashion brand

- Backend development on high-traffic international e-commerce (PHP, MySQL, Docker, AWS) within a global team.
- Lead PHP 7.2 → 8.5 migration for House of CB and Mistress Rocks (secondary brand), including full-stack legacy modernization and business-logic refactoring.
- Designed and integrated AI solutions and autonomous agents to automate internal workflows.

Founder & Full-Stack Developer

May 2025 – Present

AFM • Independent Software & AI Studio

- End-to-end delivery of scalable production full-stack platforms for clients – web development, AI integration, and business process automation.
