Full-Stack Developer | AI Integration | Legacy Modernization

Full-Stack Developer with production experience in international teams and independent software delivery for businesses. University Technician in Programming (UTN). Focused on high-traffic e-commerce backends, Next.js platforms, legacy modernization, and applied AI for business-process automation — with security, performance at scale, and production delivery on Docker, AWS, Nginx, and Cloudflare.

WORK EXPERIENCE

Full-Stack Developer

House of CB | Remote / CABA | February 2026 - Present

- Backend on high-traffic international e-commerce (~1 sale every ~30 seconds) with PHP, MySQL, Docker, and AWS, in a global team.
- Greenfield Next.js 16 rebuild of admin, internal operations, and commerce domain logic (pricing, stock, orders) replacing the legacy House of CB stack.
- Designed and integrated AI solutions and autonomous agents to automate internal workflows on the live stack; occasional storefront frontend changes when product needs require it.
- Same-group brands: full-stack PHP 7.2 → 8.5 migration and Smarty modernization (Mistress Rocks); live guest QR ordering with SSE, legacy PHP POS bridge, and brand site (Madame Pompidor, Malaysia).

Founder and Full-Stack Developer

AFM | Remote | May 2025 - Present

- End-to-end delivery of production full-stack platforms for multiple clients and verticals (travel, meal delivery, architecture studios, and more) — web apps, AI integration, and process automation.
- Flagship client: Melincue Viajes — 3-app TypeScript monorepo (API, admin, public site) with four-layer SOLID architecture: live flight/hotel/package quotation, ops reporting, AI quotation agent on WhatsApp Business Cloud API, and TDD on domain logic.
- Reusable Node.js / Next.js dashboard foundation (auth, RBAC, audit, real-time) with layered architecture and TDD to accelerate delivery across client engagements, plus the AFM studio site.

EDUCATION

University Technician in Programming - National Technological University (UTN) | 2024 - 2025

Full-Stack Web Development - Coderhouse | 2022 - 2023

SKILLS

Backend: Node.js, Express, PHP, Prisma, ASP.NET Core, C#

Frontend: Next.js, React, TypeScript, JavaScript, Tailwind CSS, HTML

Databases and Cache: MySQL, Redis, SQL Server, Oracle PL/SQL

AI and Automation: LLMs, AI Agents, Generative AI, Prompt Engineering, Process Automation

DevOps and Tools: Docker, AWS, Git, GitHub, Nginx, Cloudflare

Languages: Spanish (Native), English (B2 Upper-Intermediate)

Methodologies: Scrum, Agile, TDD, SOLID, Layered Architecture
